

## **Rei Tang**

Program Officer, Climate Change

Rei Tang is program officer for climate change at the Stanley Center for Peace and Security, where he oversees the climate team's work to limit global temperature increases to 1.5 degrees Celsius above preindustrial levels. Through policy dialogues, analysis and outreach, and work with policymakers, civil society, and the private sector, Tang helps advance international policy and cooperation for a better climate future. Tang has been a part of furthering initiatives such as the Powering Past Coal Alliance and the Marrakech Partnership for Global Climate Action.

Before joining the Stanley Center, Tang worked in Washington, DC, researching US foreign policy and national security institutions.

He has a BA in international studies from American University.
